

Manual Shearing Bending and Rolling three-in-one machine

Features:

Manual workshop guillotine shears are the simplest hand-operated shearing machine for sheet metal fabrication.

This type of manual workshop guillotine shear is the most economical for newly set-up small factories. It's because the price of the manual workshop guillotine shears is cheap than other foot shears and hydraulic metal cutting machines.

Used for cutting iron sheet, aluminum sheet, stainless steel, cardboard, plastic board, density board, etc.

1. Easy control and highly effective;
2. Finger guard protects operators;
3. Low maintenance cost.
